

EYEBALL THIS FIXTURE

IT'S NOT WHAT YOU DO - IT'S THE WAY THAT YOU DO IT!

THAT'S WHAT GETS RESULTS.

YULP! DID I USE THAT LIFTING EYE?

Maintenance types are singin' the blues over Huey (UH-1) transmissions coming in from some units. They have rusted or busted gears - and replacements don't come cheap!

All because some transmissions are being put in shipping containers without being sealed. A block of wood covering the top opening in the transmission won't hack it.

The only way to keep moisture out of the transmission is to re-install one of the lifting eyes that come with each transmission.

The fixture not only seals out moisture at the mast opening, it also has a rubber pad to hold the gears in place.

Let's save transmissions, Huey types. Use the fixture. OK?

MOISTURE SEAL
RUBBER PAD

USE LIFTING EYE IN SHIPPING CONTAINERS TO PROTECT TRANSMISSION
