## Power Plant Filter Update

**O**der the fluid filtering disk, Item 9 of Fig 47 of TM 55-2840-233-23P, with NSN 2945-01-115-9547... and order just one!

The TM tells you to order 7 of the old disks, NSN 2945-00-736-3978. But the new disk is an assembly. One will do the job that it took 7 of the old disks to do.
