

Here's how Murphy struck a Huey recently!

An oil-level sight-indicator-disk for a 42-degree gear box was installed on a 90-degree gear box. Although the indicator showed full, the oil level was actually low.

The disks are similar, but not the same. For the 90-degree gear box, you want Indicator, NSN 1615-00-975-7131. Use Indicator, NSN 6680-00-580-0724, on the 42-degree gear box.
